NDC Search Results Issue

The Kansas Medical Assistance Program (KMAP) offers an interactive Reference Codes page on the KMAP website. At this time, an incorrect message may appear when receiving results from the HCPCS Code Search page.

Incorrect positive results may occur when inputting a national drug code (NDC) that is not rebated. When the procedure code coverage information is entered into the Related NDCs box, the following message appears: NDC XXXXXXXXXX is valid for procedure XXXXX, but the manufacturer is not participating in the drug rebate program on the date of service. However, the NDC may or may not be valid for the inquired procedure code. Regardless of the message, the procedure code/NDC combination will be denied because the NDC is not eligible for drug rebate.

Providers will be notified once this issue has been corrected.
