LEA Billing Requirements

Claims billed by a Local Education Authority (LEA) must be submitted with the billing provider’s National Provider Identifier (NPI). Services billed by an LEA without the billing provider’s NPI may result in delayed payments or inaccurate routing of claims to the KanCare Managed Care Organization (MCO).

Services provided by a LEA are excluded from KanCare and are the responsibility of KMAP. Claims should be billed directly to KMAP only and not to the KanCare MCOs. When the billing provider NPI is not present on the claim, the claim is systematically routed to the MCO. When this occurs, the claims may be paid and then later recouped by the MCOs. This will result in the provider needing to send a corrected claim to KMAP for reconsideration.
